Abdulrahman Saheed

FULL-STACK SOFTWARE ENGINEER

Abuja, Nigeria · rahmvn1@gmail.com · +234 814 285 7377 · rahmvn-portfolio.vercel.app · github.com/Rahmvn

PROFILE

Full-stack software engineer independently delivering commercial applications and client websites. Experience spans React, PostgreSQL/Supabase, payment and authorization workflows, and native Android reliability engineering.

ENGINEERING EXPERIENCE

PromotionSure

Jun 2026 – Present

Sole Software Developer

promotionsure.com.ng · github.com/Rahmvn/promotionsure-engineering

- Built and maintain a commercial civil-service exam-preparation platform launched July 2026; reported 420+ registered users, 70+ paying customers and ₦400,000+ cumulative revenue by approximately September 2026.
- Implemented server-validated Paystack payments, signed webhooks and idempotent entitlement activation.
- Developed Supabase Auth/PostgreSQL RLS authorization, timed exams, scoring, content versioning and support/email workflows.

Al-Muflihoon International School

May 2026 – Present

Independent Web Developer · paid client engagement

almuflihoon.com.ng · github.com/Rahmvn/Almuflihoon

- Delivered a paid, ten-page responsive website for the school and continue to maintain it, including client-requested changes.
- Implemented mobile/keyboard navigation, enquiry forms, media interactions and discoverability metadata.

Alabarin

Sep – Oct 2026

Independent Software Engineer · independent project

github.com/Rahmvn/journey-continuity

- Built a native Kotlin/Jetpack Compose Android application with Room-backed observations and checkpoint-based synchronization after interruptions.
- Implemented a React/TypeScript Trusted Viewer and authorized Node/TypeScript MCP service with scoped access and stale-read invalidation.
- Validated one bounded recovery of 895 queued observations against backend sequences and timestamps without duplicate sequences in that run.

National Centre for Artificial Intelligence and Robotics (NCAIR)

Jul – Sep 2026

SIWES Intern · Abuja, Nigeria

- Completed about ten weeks of practical Python programming and Figma UI/UX training, including a budget tracker.

EDUCATION

Summit University, Offa, Nigeria

Expected 2028

Bachelor of Science (B.Sc.) in Software Engineering

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, SQL, Kotlin
Frontend	React, React Router, Vite, HTML (markup), CSS (styling), responsive and accessible interfaces
Backend & data	Node.js, Supabase Auth, PostgreSQL, RLS/RPCs, Deno Edge Functions, Paystack webhooks
Mobile & tools	Jetpack Compose, Room, WorkManager, Git, Playwright, Vitest, Vercel
